Question:

Some people think that diet is more important than exercise while others think that it is exercise that is the primary factor in health. Agree or disagree

In terms of diet, there are many people who believe that as more significant than exercise when it comes to the most important elements of health. In my view, diet is the most important factor, and in this essay, I will discuss both views and give my opinion.

One of the key reasons why diet is the most important factor is it cause disease. That is to say, when people eat a lot of unhealthy food consistently it can have effects on the body's development. Take junk food as an example. People who eat lots of junk food can often suffer from heart disease

Do you see the important mistake in this paragraph... CONNECTION?

Another important reason why diet is an important factor is a good diet can increase energy. In other words, when you eat the right kind of foods it means that you can focus better. Take bread for example. People who eat too much bread can often feel tired and lethargic for periods afterwards and this means that they cannot study or work as effectively.

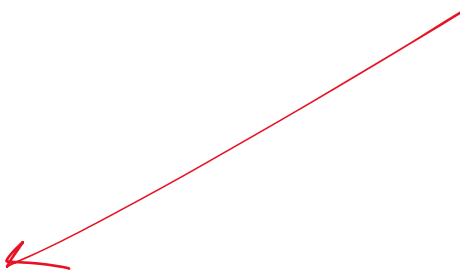

In conclusion, I believe that diet is more important than exercise when it comes to health. One reason is that bad diets cause disease and another reason is energy.
